

We build – you reap the benefits

Buying a prefabricated sauna room is not only the simplest and swiftest way to turn your dream of a sauna into reality. It's also the smartest and the safest, too. That way you can be sure of a really well-made sauna that will serve you well, year after year after year.

Selected wood type – a proper sauna requires the proper wood. Tylö uses only genuine timber of the very highest quality.

Robust construction – Tylö saunas are built to cope with all types of bathing climate.

Effective insulation with mineral wool in wall and ceiling sections and heat-resistant polyester seals.

Perfect fit every time makes assembling walls, ceiling and fittings simple and straightforward.

Glazed wall sections give a sensation of space inside the sauna and keep bathers in touch with what is going on outside.

Tempered safety glass for extra security in all glazed surfaces.

Perfect ventilation with air supply and exhaust air vents placed in accordance with the Tylö principle. This makes use of the laws of physics to spread heat naturally and create different temperature zones in the sauna.

Broad, comfortable benches in solid wood with a sturdy construction and velvet smooth surfaces.

Contoured backrests enhance comfort in the sauna and help tired muscles to relax.

Elegant skirting panels screen off the gaps between the benches.

Subdued lighting with light fittings concealed behind backrests or lampshades.

Prepared for simple electrical installation – conduits in the wall sections make electrical installation work quick and easy.

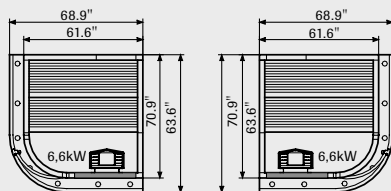

The best sauna doors – Tylö has a wide choice of alternatives, all built to cope with the huge differences in temperatures inside and outside the sauna without warping or becoming deformed.

Industry leading warranty – clear proof of the high quality of Tylö saunas.

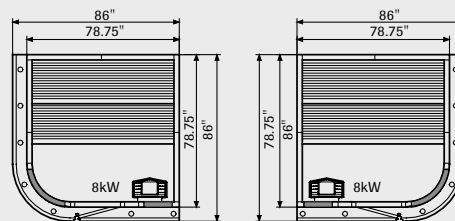

Your freedom of choice is part of our design plans

Here is a layout chart of our complete range of prefabricated sauna rooms. You can see sizes, the correct location of the sauna heater and the layout of the interior fittings. All our sauna rooms can also be installed mirror fashion (except Vital Vision). You can also add windows as desired. For the sake of clarity we also indicate the optimum heater output for each of the rooms. All you need to do is measure, compare and decide which sauna room is the best for you.

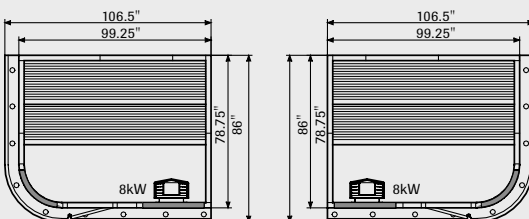

Space Vision 150, corner entrance.
(External roof height 79.92")

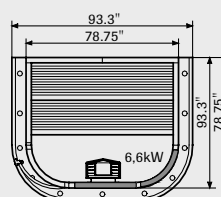

Space Vision 200, front entrance.
(External roof height 79.92")

Space Vision 250, front entrance.
(External roof height 79.92")

Midi Vision
(External roof height 79.92")

*The interior cannot be installed mirror fashion.
